Objectives: The objectives of this experiment were to determine the identities of 14 aqueous solutions using chemistry knowledge and to strengthen skills of observation, analysis, and deduction.

Procedure: The procedure that was

Access Free 14 Bottle Lab

used was to initially
try burning each
solution over a
bunson burner with
a little bit of each
aqueous solution on
a stick.

Soda Bottle

Experiment

Objective: Given that a soda bottle roughly resembles a cylinder, we expect a linear relationship between the height of the water and the amount of water filled in. That relationship will be tested and, if it

Access Free 14 Bottle Lab

holds, will be used to measure the circumference of the bottle.
