Volkswagen 2.0 TDI diesel for Euro 6d: SCR twin-dosing. Volkswagen continues to refine its most important diesel engine, the 2.0-liter TDI. With SCR twin dosing technology in the exhaust gas system, the diesel unit now undercuts the Euro 6d emission standard limits while also running quietly and smoothly, according to the company.

Volkswagen 2.0 TDI diesel for Euro 6d: SCR twin-dosing ...

The 2.0 Liter TDI common rail engine uses a forged crankshaft to accommodate high mechanical loads. Instead of the customary eight counterweights, this crankshaft has only four. Using four counterweights reduces the load on the crankshaft bearings, as well as noise emissions that can occur due to the intrinsic motion and vibrations of the engine.

The new EA288 engine will eventually replace all the 2.0L TDI Clean Diesel engines currently fitted in Audi and Volkswagen TDI Clean Diesel models. The turbocharged, common-rail, direct-injection four-cylinder engine makes 150 hp — an increase of 10 hp over the current engine — and 236 lb.-ft. of torque. This powerplant shares only the bore spacing with the previous diesel engine that had the same designation, according to the automaker.
