This is a comprehensive survey of European history from the coup d'etat of Napoleon Bonaparte in France to the assassination of the Archduke Ferdinand at Sarajevo, which led to the First World War. It concentrates on the twin themes of revolution and nationalism, which often combined in the early part of the century but which increasingly became rival creeds. Going beyond traditional political and diplomatic history, the book incorporates the results of recent research on population movements, the expansion of markets, the accumulation of capital, social mobility, education, changing patterns of leisure, religious practices, and intellectual and artistic developments. The work falls into three chronological sections. The first, starting in 1800 (rather than the more usual 1815) follows the build-up of the revolutionary currents which were eventually going to erupt in the 'Year of Revolutions' 1848. The second, from 1850 to 1880, deals with the golden age of capitalism, the successful culmination of struggles for national unification, and the threat of anarchism. The concluding chapters look at the social and political stresses caused by socialism and national minorities, at new attempts by government to order society, imperial rivalry, and the descent into a war which was to mark the end of nineteenth-century Europe. For this third edition, Dr Gildea has substantially revised the text and maps, and completely updated the bibliography. Newly-added introductory sections guide the reader through the wealth of material in each chapter. The new edition also includes for the first time a full Chronology of the period, a list of leading state ministers, and family trees for all the major dynasties.

Bill Gates is not only the world's most successful capitalist; he's the world's biggest philanthropist. Gates has approached philanthropy the same way he revolutionized computer software: with a fierce ambition to change the rules of the game. That's why at last year's annual meeting of the World Economic Forum in Davos, Switzerland, Gates advocated a 'creative capitalism', in which big corporations should integrate doing good into their way of doing business. This controversial new idea is discussed and debated by the more than 40 contributors to this book, among them three Nobel laureates and two former U.S. cabinet secretaries. Edited by author and columnist Michael Kinsley, Creative Capitalism brings together some of the world's best minds to engage Gates's challenge. From Warren Buffet, who seconds Gates's analysis, to Lawrence Summers, who worries about the consequences of multiple corporate objectives, the essays cover a broad spectrum of opinion. Creative Capitalism is not just a book for philanthropists. It's a book that challenges the conventional wisdom about our economic system, a roadmap for the new global economy that is emerging as capitalism adapts itself once again to a changing world.

This book is a highly informative, highly entertaining introduction to what art direction is and what art directors do. Written by two of the world's leading experts on the subject, it covers the role of art director in numerous environments, including magazines and newspapers, advertising, corporate identity, museums, and publishing. It also provides an insight into what makes a successful art director, what an art director actually does all day, what makes things go right, and what makes things go wrong. Alongside perspectives on typography, illustration, and photography, there are case studies of successful art direction in different spheres, from McSweeney's to Vier5's web design. The authors have also invited pre-eminent international art directors to interpret their roles in special sections of the book that they have art directed themselves. The result is an impressive, enlightening, and often very funny diversity of perspectives and approaches. Clearly written, including a glossary of handy art director sayings, an "art director test," and more, *Art Direction Explained, At Last!* will provide students with insights into the world of art direction and professionals with a perceptive overview of their profession.
