Time Sample Observation by doreen clark - Prezi

THE aim of my observation was to study and observe the target child ' s cognitive ability and development, although there was a lot going on in the room at the time, I feel the observation went according to plan and I got a good overall picture of the target child ' s cognitive ability, and through this I can see she is reaching all the milestones for her age, as cognitive development covers ...

Observational Child Study Assignment - UKDiss.com

Time sample. Time samples are a narrative snapshot of what a child is doing at a particular moment in time. They are completed at pre-determined intervals, e.g. every 15 minutes, depending on the total length of time you want for your observation. Although they do give some idea of what a child is doing over an extended period of time, they are limited as they do not record anything significant that occurs outside of the planned times.

OBSERVATION METHODS - Laser Learning
