Amazon Web Services (AWS) To Decide Whether It Is The Perfect Cloud Computing Solution For Your Business! The global public cloud computing market is estimated to be worth over \$250 billion, with top companies setting annual cloud computing budgets of over \$2 million per year, equivalent to about 1/3 of the company's IT budget. Indeed, efficient, high performing and profitable companies around the world have realized that cloud computing is the secret to massive growth and efficiency in service delivery on a global scale especially because it (cloud computing) allows data access from anywhere in the world. And at the center of it all is the world's biggest cloud computing solution, AWS, controlling over 47% of the market share, with an estimated market value of \$400 billion. So what makes AWS different from all the other cloud computing solutions? Why should you adopt AWS and not any other cloud

Après avoir investi significativement dans la conception, la promotion et la mise à jour de leurs sites Internet, les entreprises et les organisations publiques sont souvent déçues par les résultats obtenus. Malgré un trafic croissant, peu de visiteurs réalisent les actions souhaitées, telles qu'acheter un produit ou gérer un compte en ligne. Pourtant, grâce aux solutions de Web analytics, des informations inestimables sont disponibles sur le comportement des visiteurs : leur provenance, ce qu'ils font sur le site et à quelle page ou étape ils en sont. En maîtrisant l'ensemble de ces informations, il est possible de réduire les coûts d'acquisition du trafic, d'augmenter les ventes et les transactions réalisées en ligne et ainsi générer des profits sur votre site Internet. Toutefois, faire des analyses pertinentes et bien optimiser les parcours des visiteurs ne

discovered they all had surprisingly similar concerns. In this prescient and pragmatic book, he and his team sum up these concerns in what they call the ADAPT framework: Asymmetry of wealth; Disruption wrought by the unexpected and often problematic consequences of technology; Age disparities--stresses caused by very young or very old populations in developed and emerging countries; Polarization as a symptom of the breakdown in global and national consensus; and loss of Trust in the institutions that underpin and stabilize society. These concerns are in turn precipitating four crises: a crisis of prosperity, a crisis of technology, a crisis of institutional legitimacy, and a crisis of leadership. Sheppard and his team analyze the complex roots of these crises--but they also offer solutions, albeit often seemingly counterintuitive ones. For example, in an era of globalization, we

need to place a much greater emphasis on developing self-sustaining local economies. And as technology permeates our lives, we need computer scientists and engineers conversant with sociology and psychology and poets who can code. The authors argue persuasively that we have only a decade to make headway on these problems. But if we tackle them now, thoughtfully, imaginatively, creatively, and energetically, in ten years we could be looking at a dawn instead of darkness.
