A must-have for Finals success! Revise and prepare for Finals with question papers and comprehensive answers that test your knowledge and help you learn This question book covers all medical specialties, as well as surgical specialties, paediatrics, orthopaedics, and obstetrics and gynaecology, to provide a fully comprehensive revision and study tool for Finals. Complete SAQs for Medical Finals comprises at least ten questions in each section, in the style seen and used in SAQ Finals papers. Short case scenarios set the scene, from which questions are then taken, and each question is fully explained to help understanding and learning. Featuring two complete practice papers, and written by recently graduated Foundation doctors, this is essential for any medical student preparing for Finals to test understanding, identify weak areas, consolidate knowledge, and hone decision-making skills.

This detailed guide is a must for medical students preparing for clinical attachment and final exams. Its wide-ranging approach is also ideal for those sitting GP entrance exams. Presenting short answer questions encompassing the entire current curriculum, this informative revision aid covers all bases.

Provides a range of short clinical cases with questions and detailed structured answers to test students' problem-solving and decision-making skills in a structured and objective fashion.

Get ahead! is a brand new essential revision series for medical and surgical finals. Each title contains practice questions similar to those you can expect in the real exam. The series stands out in its use of subject summaries that include all the detail you would need from a larger textbook—but we've waived the

waffle! If you are looking for a comprehensive, reliable, effective revision aid, then look no further than Get ahead!

A well prepared student takes the initiative to create learning opportunities and propel themselves towards qualification; we find that the better prepared you are, the luckier you become. From the Preface The key to passing clinical finals is not a secret; adequate preparation and the ability to think logically and speak clearly are all hallmarks of a successful candidate. This unique guide gives final year students the knowledge and confidence required to pass their examinations with insiders' tips on particular information and skills required to be a top candidate. It is ideal as both a revision aid in the weeks leading up to the examination, and as an aide-memoire the night before.

EMQs are a popular method of assessing how broad a knowledge of medicine an undergraduate has acquired. They can, however, be difficult to prepare for, and the best way to build understanding and confidence is with practice. Presenting 100 key EMQs covering the core areas of medicine and surgery, care had been taken by the authors to structure the questions and answers so that they reflect accurately the themes uncountered during study and, specifically, in final exams. Each subject covered is accompanied by a revision section which summarises key points and cross references them to other questions for revision purposes. Questions related to pharmacology, an area which many students find particularly challenging, are threaded throughout the book where relevant, mirroring the integrated teaching methods common to most medical schools. The second edition of EMQs in Clinical Medicine has been thoroughly revised and updated to reflect medical developments, while retaining the clear and comprehensive approach and popular revision boxes of its predecessor. The authors' first-hand experience of EMQ-based examinations, and awareness of the importance of reliable and accurate revision guides to medical students, ensure EMQs in Clinical Medicine remains and invaluable resource for all medical students undertaking the clinical part of their training, and an ideal companion during finals preparation.

Filling a gap for a pre-clinical phase revision guide, this book will help medics pass their intermediate exams in order to proceed to the clinical years. It is based on the SAQs, EMQs and MCQ school curriculum as set out by the GMC. By covering each module individually but also integrating other disciplines of medicine into the questions, it helps students to think laterally as well as thoroughly revising each module. With a minimum of 4 SAQs, 7 MCQs and 3 EMQs in each chapter, this book offers comprehensive revision practice as well as providing all the answers with clear explanations.

Single Best Answer (SBA) examinations are an increasingly popular means of testing medical students and those undertaking postgraduate qualifications in a number of subject areas. Written by a final year medical student, junior doctors and experienced clinicians, 500 Single Best Answers in Medicine provides invaluable guidance from authors who understand from personal experience that detailed and accurate explanations are the key to successful revision. This book presents 500 SBA-style questions arranged by specialty area as well as a practice exam of random questions. A clear discussion of how the correct answer was reached and other options ruled out for every question is given at the end of each section, making this book an excellent learning aid during all stages of clinical studies, and particularly while preparing for medical finals.

Filling a gap for a pre-clinical phase revision guide, this book will help medics pass their intermediate exams in order to proceed to the clinical years.
