Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

Provides students with an inexpensive note-taking system that contains a reduced copy of every slide in the PowerPoint presentation.

Corporate Finance, by Ross, Westerfield, and Jaffe emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The well-respected author team is known for their clear, accessible presentation of material that makes this text an excellent teaching tool. The ninth edition has been fully updated to reflect the recent financial crisis and is now accompanied by Connect, an exciting new homework management system.

As indicated by the title, this book focuses on fundamental problems in finance: a logical dilemma in valuation, stock valuation methods/models, risk valuation, and optimal capital structure. It presents an innovative approach to logic and quantitative reasoning (without advanced mathematics) that delivers valuable results ---- convincing solutions to these problems. Readers in finance will definitely be interested in these solutions as well as the methods. In fact, these fundamental problems are essential in the field of finance, and they have remained unsolved (or partly unsolved) for decades. The solutions offered in this book are all sound in theory and feasible in practice, and will hopefully benefit both theoretic al research and practical decision-making.

The Solutions Manual, carefully revised by Peter Crabb of Northwest Nazarene University, contains solutions to all basic, intermediate, and challenge problems found at the end of each chapter. This supplement can be purchased by students with instructor approval or can be packaged with this text at a discount.

This pedagogically innovative and interactive corporate finance textbook not only introduces and develops core corporate finance material, but does so in a way that will capture the imagination of UK and international business and management students at undergraduate, postgraduate and professional level. As well as offering an in-depth examination of the key areas of the corporate finance syllabus, this text incorporates interesting and topical examples, cases and illustrations, bringing real life to bear on the concepts presented, and creating a lively, engaging learning tool. An activity-based approach and a unique, approachable writing style make this textbook the perfect companion for students on introductory corporate finance modules. Online Resource Centre For students * Key learning points for each

chapter * Two further mini-cases for each chapter with questions and answers * Critical Thinking / review questions * Ten self test quantitative questions with answers * Pod cast introduction to chapters * Web-based simulation game * MP3 transcripts of interviews with finance specialists For lecturers * Instructor's manual to include PowerPoint Slides with a facility to customise into a course pack * Short answer questions / answers * Suggestions for discursive questions * Tutorial solutions and case study answer outlines * Testbank of questions on different levels (to follow the case study categories - theoretical, practical, strategic, investor, reflective)

Score your highest in corporate finance The math, formulas, and problems associated with corporate finance can be daunting to the uninitiated.
