A latest annual anthology complements top-selected American poems of the year with poet notes about their creative processes.

From her seminal *Eros the Bittersweet* (1986) to her experimental *Float* (2016), *Bakkhai* (2017) and *Norma Jeane Baker of Troy* (2019), Anne Carson's engagement with antiquity has been deeply influential to generations of readers, both inside and outside of academia. One reason for her success is the versatile scope of her classically-oriented oeuvre, which she rethinks across multiple media and categories. Yet an equally significant reason is her profile as a classicist. In this role, Carson unfailingly refuses to conform to the established conventions and situated practices of her discipline, in favour of a mode of reading classical literature that allows for interpretative and creative freedom. From a multi-praxis, cross-disciplinary perspective, the volume explores the erudite indiscipline of Carson's classicism as it emerges in her poetry, translations, essays, and visual artistry. It argues that her classicism is irreducible to a single vision, and that it is best approached as integral to the protean character of her artistic thought. *Anne Carson/Antiquity* collects twenty essays by poets, translators, artists, practitioners and scholars. It offers the first collective study of the author's classicism, while drawing attention to one of the most avant-garde, multifaceted readings of the classical past.

"The signature undertaking of the Twenty-Second Edition was clarifying the QC practices necessary to perform the methods in this manual. Section in Part 1000 were rewritten, and detailed QC sections were added in Parts 2000 through 7000. These changes are a direct and necessary result of the mandate to stay abreast of regulatory requirements and a policy intended to clarify the QC steps considered to be an integral part of each test method. Additional QC steps were added to almost half of the sections."--Pref. p. iv.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
