achievable through mind-numbing toil, the writer draws heavily from biographical, philosophical, economic, religious, historical and scientific data. Work is the mission; the multiple rewards are the byproducts, he argues. Moreover, the pleasure resides in the effort, not the results. Against the dark backdrop of malignancies inflicted on society by unrepentant leeches, the benefit of conscientious work is sharply focused. The reader is imperceptibly nudged into a higher plane of reality: namely, purposeful effort, regardless of its nature, is

supremely rewarding. The writer forces the realization that regardless of the outcome, effort is never wasted. Conversely, indolence is the bane of progress and the root cause of economic crimes. Indeed, corruption in all its diabolical forms is nothing but laziness masquerading as diligence and embraced by vacuous minds craving the most for the least. Analysis of biographical data sustains the thesis that industry prolongs life; inaction truncates it - a finding supported by the second Law of Thermodynamics. The persuasiveness of the

When gay couples become parents, they face a host of questions and issues that their straight counterparts may never have to consider. How important is it for each partner to have a biological tie to their child? How will they become parents: will they pursue surrogacy, or will they adopt? Will both partners legally be able to adopt their child? Will they have to hide their relationship to speed up the adoption process? Will one partner be the primary breadwinner? And how will their lives change, now that the presence of a child has

Drawing on empirical data from her in-depth interviews with 70 gay men, Goldberg analyzes how gay dads interact with competing ideals of fatherhood and masculinity, alternately pioneering and accommodating heteronormative “parenthood culture.” The first study of gay men's transitions to fatherhood, this work will appeal to a wide range of
