As today's cars continue to become more complicated and complex, the cost to repair them has continued to climb. However, with some basic knowledge and a little know-how, many of the most expensive repairs can be avoided by simple, regular maintenance, or relatively inexpensive repairs that can be done with a few tools and step-by-step instructions. Car expert, Dave Stribling, has seen every repair in the book, and in *Idiot's Guides: Auto Repair and Maintenance*, he arms readers with the knowledge they'll need to troubleshoot and diagnose common problems and make simple repairs that are universal to most makes and models. Dozens of step-by-step, full-color photos and illustrations make DIY car repairs and maintenance so much easier. When the repair calls for an expert the time comes to take the car to the shop, Dave arms readers with the knowledge they'll need to make the right choices, to avoid unnecessary repairs, and to minimize the possibility of getting ripped off.

Haynes offers the best coverage for cars, trucks, vans, SUVs and motorcycles on the market today. Each manual contains easy to follow step-by-step instructions linked to hundreds of photographs and illustrations. Included in every manual: troubleshooting section to help identify specific problems; tips that give valuable short cuts to make the job easier and eliminate the need for special tools; notes, cautions and warnings for the home mechanic; color spark plug diagnosis and an easy to use index.

A pastor of 30 years learns how powerful the Gospel can touch one life at a time and how much one soul is worth to God. (Christianity)

Written in a humorous style by bestselling author Boris Starling, *Haynes Explains: Sex Owners' Workshop Manual* is part of the award-winning *Haynes Explains* series. A light-hearted and entertaining take on the classic workshop manual, it contains everything you'd expect to see including exploded views, flow charts, fault diagnosis and the odd wiring diagram. It takes the reader through all areas of sex, giving all the hints and tips needed to make the entire experience run smoothly.

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-

The latest modern armoured fighting vehicle to receive the Haynes treatment is the CVRT Scorpion. The Scorpion CVRT Enthusiasts' Manual will be fully illustrated with archive photos, technical drawings and detailed photography. The author, Simon Dunstan, is an experienced military author who will had and exclusive access to CVRT vehicles as he was writing the book.

Intended to act as a supplement to introductory microbiology laboratory manuals. This full-color atlas can also be used in conjunction with your own custom laboratory manual.

This new compendium is the first volume in the Art of Tactics series, sponsored by the Department of Army Tactics, US Army Command and General Staff College. This collection examines various aspects of division-level operations, to include Fires, Wet Gap Crossings, and Consolidating Gains, as part of the Army's effort to refocus the force on large-scale combat against near peer and peer adversaries. In 1915, the Department of Military Art of the Army Service Schools at Fort Leavenworth, Kan., revised and published Studies in Minor Tactics. In the preface of this volume, Lt. Col. W. A. Holbrook, cavalry officer and senior instructor for the department, wrote: "It is believed this book will prove of great value to those officers seeking information as to the practical handling of small units in field operations, and of marked assistance to those preparing themselves for admission to The Army Service Schools." More than 100 years later, the Department of Army Tactics (DTAC) aspires to deliver a volume of similar value as our Army orients on largescale combat operations. In this inaugural contemporary compendium, several DTAC faculty members—representing both active-duty and retired Army officers—have put their ideas on paper to reinforce our emerging Operations doctrine and continue the professional discourse required to stimulate and improve our profession of arms. The chapters in this volume are intentionally focused on large-scale combat operations at the division level. While there was no specific guidance to address any particular warfighting function, most of the work is oriented on mission command or movement and maneuver. There is a nod to fires and intelligence, as well as the broader areas of leadership and information within the elements of combat power. All chapters adhere to the aim of contributing to our body of knowledge and assisting the force. A project of this type does not just happen, and I am grateful to the authors who chose to put themselves out there and to the many peers and colleagues who critically reviewed their work. I also wish to thank Dennis S. Burket, the current Gen. George S. Patton Jr. Chair of Tactical Studies, for his exceptional dedication to the quality and production of what we intend to be an ongoing publication from DTAC.
