in France witnessed a fundamental change in the way ghost stories were conceived. In medieval culture, ghost narratives had served as ideological instruments for Church teaching: they fostered a bringing together of the communities of the living and the dead. With the advent of Reformation, however, this view of ghosts came under strain. Alongside religious ghost narratives there began to emerge a whole series of stories written from rival perspectives (legal, medical, anthropological, and literary) a body of writing largely ignored by modern scholarship.
