Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates.

Describes the modern world's struggles with depression and burnout in the face of mounting economic pressures, with advice on how to experience authentic happiness by accepting moderate resource levels.

Melanie Cooper and Angie DeLaura are finally living out their dream as the proud owners of the Fairy Tale Cupcakes bakery. But their first big client is a nightmare. She's a bridezilla who wants 500 custom cupcakes for her wedding. When Mel stumbles upon the bride-to-be dead-by-cupcake, she becomes the prime suspect. To save themselves and their business, the ladies need to find the real murderer, before the cupcake killer ices someone else.

Dual nationality is a contentious issue in both the US and Europe. Contending that theirs is the first volume since Bar-Yaacov's 1961 book to focus primarily on this topic rather than simply on citizenship, Hansen (politics, Oxford U.) and Weil (Centre for Research on the History of Social Movements and Trade Unionism, Paris I-Sorbonne) introduce the pro and con arguments in historical and normative contexts. In 13 chapters, scholars examine the problems and possibilities of dual citizenship in Germany, the UK, France, and North America, and the related issues of gender and social rights, European Union citizenship, and the overlooked question in nationality law of nationality within a federation. Over the past 150 years scientists have discovered evidence that at least twenty-seven species of humans evolved on planet Earth. These weren't simply variations on apes, but upright-walking humans who lived side by side, competing, cooperating, sometimes even mating with our direct ancestors. Why did the line of ancient humans who eventually evolved into us survive when the others were shown the evolutionary door? Chip Walter draws on new scientific discoveries to tell the fascinating tale of how our survival was linked to our ancestors being born more prematurely than others, having uniquely long and rich childhoods, evolving a new kind of mind that made us resourceful and emotionally complex; how our highly social nature increased our odds of survival; and why we became self aware in ways that no other animal seems to be. Last Ape Standing also profiles the mysterious "others" who evolved with us-the Neanderthals of Europe, the "Hobbits" of Indonesia, the Denisovans of Siberia and the just-discovered Red Deer Cave people of China who died off a mere eleven thousand years ago. Last Ape Standing is evocative science writing at its best-a witty, engaging and accessible story that explores the evolutionary events

that molded us into the remarkably unique creatures we are; an investigation of why we do, feel, and think the things we do as a species, and as people-good and bad, ingenious and cunning, heroic and conflicted.

The author offers his personal take on America's poverty-stricken urban neighborhoods, recalling the lessons he has learned from time spent among the nation's poorest people.
