Seeking the Truth from Mobile Evidence: Basic Fundamentals, Intermediate and Advanced Overview of Current Mobile Forensic Investigations will assist those who have never collected mobile evidence and augment the work of professionals who are not currently performing advanced destructive techniques. This book is intended for any professional that is interested in pursuing work that involves mobile forensics, and is designed around the outcomes of criminal investigations that involve mobile digital evidence. Author John Bair brings to life the techniques and concepts that can assist those in the private or corporate sector. Mobile devices have always been very dynamic in nature. They have also become an integral part of our lives, and often times, a digital representation of where we are, who we communicate with and what we document around us. Because they constantly change features, allow user enabled security, and or encryption, those employed with extracting user data are often overwhelmed with the process. This book presents a complete guide to mobile device forensics, written in an easy to understand format. Provides readers with basic, intermediate, and advanced mobile forensic concepts and methodology Thirty overall chapters which include such topics as, preventing evidence contamination, triaging devices, troubleshooting, report writing, physical memory and encoding, date and time stamps, decoding Multi-Media-Messages, decoding unsupported application data, advanced validation, water damaged phones, Joint Test Action Group (JTAG), Thermal and Non-Thermal chip removal, BGA cleaning and imaging, In-System-Programming (ISP), and more Popular JTAG boxes \ Z3X and RIFF/RIFF2 are expanded on in detail Readers have access to the companion guide which includes additional image examples, and other useful materials

Celestial Mechanics reviews current state-of-the-art aspects in the area of Space Dynamics and Celestial Mechanics. The contents have been divided into five parts: The first part contains articles related to Restricted Three Body Problem. The second part contains Satellite Theory, Non-linear motion and stability of two cable connected artificial earth satellites under perturbative forces. In the third part, the Gravitational interaction between galaxies and motion of the moon is discussed in detail. Section four describes the General Celestial Mechanics, the theory of exo-solar planets confirming the migratory theory of planets and the Geometric Algebra an alternative approach to celestial mechanics. The book concludes with the Moon Mission to be carried out by Government of India at Vikram Sarabhai Space Centre, Thiruvananthapuram, with the Chapter Non-traditional Trajectory Designs for Lunar Missions An Approach for Chandrayaan-I describing, in detail, the Moon Missions in different countries.

Love takes a special kind of courage . . . Captain Sterling Garlington has faced down enemy fire without losing his nerve. But after a life-altering injury derails his military career, the former US marine is suddenly taking his marching orders from a sexy, edgy beauty at the Elk Heights Ranch. Even more amazing, equine therapist Harper Matthews makes him want to not only embrace life again!but give in to the attraction simmering between them. Her love of horses is Harper's magic bullet!her way of healing the painful past. And in the wounded soldier she recognizes a kindred spirit. Part of her wants to bolt, yet at the same time Sterling is drawing her closer. Maybe it's his courage. Or his mega-watt smile. Or both. Either way, she'll make a cowboy out of the wary war hero yet. It's like getting back on a horse. They'll just have to learn to trust each other!and be willing to open their hearts . . . \Obsessed. That's how I felt while reading this book, like every page was better than the previous. Just try to put this down, I dare you.\#1 New York Times Bestselling Author Rachel Van Dyken on Heart of a Cowboy

The well-known astronomer presents an illustrated guide to the universe and to Earth's relationship to it, moving from theories of creation to humankind's discovery of the cosmos, to general relativity, to space missions, and beyond

During his younger days working as a bush mechanic and pearl diver in remote WA, Greg Quicke spent countless nights lying in a swag and staring at the stars. That daily distraction grew into a passion that has seen him become one of Australia's best known and most engaging astronomers. In recent years Greg \ aka 'Space Gandalf' \ has taken on cult status among audiences via his appearances alongside Professor Brian Cox in the hit TV series Stargazing Live. Greg's practical explanations of the complexities of space have also earned him respect from astronomers around the world. Is The Moon Upside Down? is an absorbing guided tour of the cosmos as seen through Greg's eyes. Unlike many of his peers who studied at university he offers a unique and refreshing perspective on astronomy that was instead forged on cliff tops outside Alice Springs, in the endless expanse of the Great Sandy Desert, on the floor of the Indian Ocean and in his own front yard in Broome. No matter what mysteries you've pondered about Earth's astral dance with the Sun, planets, Moon and the stars, it's guaranteed Greg has thought about them too, and the answers can be found in the pages of this book.
