Indstillet til Finlandiaprisen (2011)

Zola's The Fat and the Thin reveals two sides of society: the rich and the poor. The novel centers on Lisa Quenu, a newly wealthy woman. As Lisa Quenu becomes more and more wealthy, her greed increases, and by the end of the story, she turns her convict brother in to the police.

The crimes of Charles Manson, Ted Bundy, Jeffrey Dahmer, John Wayne Gacy, Dennis Rader, and other high-profile killers are so breathtakingly awful that most people would not hesitate to label them evil. In this groundbreaking book, renowned psychiatrist Michael H. Stone-host of Discovery Channel's former series Most Evil-uses this common emotional reaction to horrifying acts as his starting point to explore the concept and reality of evil from a new perspective. In an in-depth discussion of the personality traits and behavior that constitute evil across a wide spectrum, Dr. Stone takes a clarifying scientific approach to a topic that for centuries has been inadequately explained by religious doctrines. Basing his analysis on the detailed biographies of more than 600 violent criminals, Stone has created a 22-level hierarchy of evil behavior, which loosely reflects the structure of Dante's Inferno. He traces two salient personality traits that run the gamut from those who commit crimes of passion to perpetrators of the worst crimes-sadistic torture and murder. One trait is narcissism, as exhibited in people who are so self-centered that they have little or no ability to care about their victims. The other is aggression, the use of power over another person to inflict humiliation, suffering, and death. Stone then turns to the various factors that, singly or intertwined, contribute to pushing certain people over the edge into committing heinous crimes. They include heredity, adverse environments, violence-prone cultures, mental illness or brain injury, and abuse of mind-altering drugs. All are considered in the search for the root causes of evil behavior. What do psychology, psychiatry, and neuroscience tell us about the minds of those whose actions could be described as evil? And what will that mean for the rest of us? Stone discusses how an increased understanding of the causes of evil will affect the justice system. He predicts a day when certain persons can safely be declared salvageable and restored to society and when early signs of violence in children may be corrected before potentially dangerous patterns become entrenched. Michael H. Stone, MD (New York, NY) is professor of clinical psychiatry at the Columbia

College of Physicians and Surgeons. He is the author of ten books, most recently *Personality Disorders: Treatable and Untreatable*, and over two hundred professional articles and book chapters. He is also the host of Discovery Channel's former series *Most Evil* and has been featured in the *New York Times*, *Psychology Today*, the *Christian Science Monitor*, *CNN*, *ABC News*, *CBS News*, *NBC News*, the *New York Post*, the *London Times*, the *BBAC*, and *Newsday*, among many other media outlets.

After a night out partying, a slacker finds a cell phone on a train and begins receiving text messages inviting him to play a game where participants rate videos of pranks and criminal acts that eventually start merging into the real world.

It is True Dickinson's birthday and her best friends have gathered on this snowy night to celebrate—yet True has never felt more alone. Though her small business is thriving and her young son is happy, the death of her husband eight years ago has left an empty space in her life that friends and family cannot fill. Suddenly it seems that youth and beauty are slipping away while True is busily taking care of everyone else. But on this night, an accident on an icy road will offer True the golden opportunity to let love back into her life—if she can somehow conquer her fears. *Twelve Times Blessed* is a powerfully moving novel of the heart from one of our best-loved storytellers.

Practice partial differential equations with this student solutions manual Corresponding chapter-by-chapter with Walter Strauss's *Partial Differential Equations*, this student solutions manual consists of the answer key to each of the practice problems in the instructional text. Students will follow along through each of the chapters, providing practice for areas of study including waves and diffusions, reflections and sources, boundary problems, Fourier series, harmonic functions, and more. Coupled with Strauss's text, this solutions manual provides a complete resource for learning and practicing partial differential equations.

A searingly powerful memoir about the impact of addiction on a family. In the summer of 2012 a woman named Eva was found dead in the London townhouse she shared with her husband, Hans K. Rausing. The couple had struggled with drug addiction for years, often under the glare of tabloid headlines. Now, writing with singular clarity and restraint, Hans' sister, the editor and publisher Sigrid Rausing, tries to make sense of what happened. In *Mayhem*, she asks the difficult questions those close to the world of addiction must face. "Who can help the addict, consumed by a shaming hunger, a need beyond control? There is no medicine: the drugs are the medicine. And who can help their families, so implicated in the self-destruction of the addict? Who can help when the very notion of 'help' becomes synonymous with an exercise of power; a familial police state; an end to freedom, in the addict's mind?" An eloquent and timely attempt to understand the conundrum of addiction—and a memoir as devastating as it is riveting.

Mikael, a young gay photographer, finds near his apartment block a small, man-like creature. It is a troll, a beast familiar to us from Scandinavian mythology where, through the ages, it has been used to frighten children. The first thing he does is research everything that has been written about trolls.
