Growing up in
suburban Detroit,
David Hahn was
fascinated by science,

building a nuclear breeder reactor in his backyard garden shed. In *The Radioactive Boy Scout*, veteran journalist Ken Silverstein recreates in brilliant detail the months of David 's improbable nuclear quest. Posing as a physics professor, David solicited

of information.)

Scavenging antiques
stores and junkyards
for old-fashioned
smoke detectors and

gas lanterns—both of which contain small amounts of radioactive material—and following blueprints he found in an outdated physics textbook, David cobbled together a crude device that threw off toxic levels of radiation. His unsanctioned and

Technology and increasing levels of education have exposed people to more information than ever before.

These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual

egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All

Online Library Nuclear Science

voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism.

Tom Nichols' *The Death of Expertise* shows how this rejection of experts has occurred: the openness of the internet, the
