New to this edition: Technology & Innovation Management , Volume 13, V K Narayanan & Gina O'Connor. The encyclopedia is available online through Wiley Online Library, a major database of Journals, Handbooks and reference in the field.

Balancing the Tides highlights the influence of marine practices and policies in the unincorporated territory of American S?moa on the local indigenous group, the American fishing industry, international seafood consumption, U.S. environmental programs, as well as global ecological and native concerns. Poblete explains how U.S. federal fishing programs in the post-World War II period encouraged labor based out of American S?moa to catch and can one-third of all tuna for United States consumption until 2009. Labeled "Made in the USA," this commodity was sometimes caught by non-U.S. regulated ships, produced under labor standards far below continental U.S. minimum wage and maximum work hours, and entered U.S. jurisdiction tax free. The second half of the book explores the tensions between indigenous and U.S. federal government environmental goals and ecology programs. Whether creating the largest National Marine Sanctuary under U.S. jurisdiction or collecting basic data on local fishing, initiatives that balanced western-based and native expectations for respectful community relationships and appropriate government programs fared better than those that did not acknowledge the positionality of all groups involved. Despite being under the direct authority of the United States, American S?moans have maintained a degree of local autonomy due to the Deeds of Cession signed with the U.S. Navy at the turn of the twentieth century that created shared indigenous and federal governance in the region. Balancing the Tides demonstrates how western-style economics, policy-making, and knowledge building imposed by the U.S. federal government have been infused into the daily lives of American S?moans. American colonial efforts to protect natural resources based on western approaches intersect with indigenous insistence on adhering to customary principles of respect, reciprocity, and native rights in complicated ways. Experiences and lessons learned from these case studies provide insight into other tensions between colonial governments and indigenous peoples engaging in environmental and marine-based policy-making across the Pacific and the globe. This study connects the U.S.-American S?moa colonial relationship to global overfishing, world consumption patterns, the for-profit fishing industry, international environmental movements and studies, as well as native experiences and indigenous rights. Open Access publication of this book was made possible by the Sustainable History Monograph Pilot, an initiative sponsored by the Andrew W. Mellon Foundation.

Integrated Pest Management for Cultural Heritage is a practical, color- illustrated, working handbook for the curator, conservator and all persons concerned with the management of collections. It is an essential guide to the recognition of insect, rodent and bird pests with advice on the practical steps required to prevent and control damage to collections. While presenting the latest information on the trapping and detection of pests, the author explains the advantages and disadvantages of physical and chemical control measures including concerns about the use of pesticides and their effects on staff and the environment. In addition he demonstrates that Integrated Pest Management (IPM) is not only a safer option but also a more cost-effective solution to the complex problems of pest control. This book offers comprehensive guidance for the treatment of any pest problem likely to be encountered in museums, archives and historic houses. Contents: Chapter 1: Introduction to Integrated Pest Management in Cultural Heritage - What is Integrated Pest Management?; Key components of Integrated Pest Management; Developing a strategy; Preventing pests; Recognising pests; Assessing the problem; Solving pest problems Implementing Integrated Pest Management Chapter 2: Insect pests - Why are insects pests?; What are insects?; What are the Pests?; Pests which attack wool, fur, feathers and textiles; Herbarium collections, dried food etc.; General detritus feeders, mould feeders and scavengers; Woodborers; Termites; Mites Chapter 3: Insect detection and monitoring - Where do insects come from?; What to look for?; Insect traps; Pheromones; X-rays and incubation Chapter 4: Prevention of insect infestation - Exclusion; Environment; Hygiene; Storage; Quarantine Chapter 5: Control of insects - Options for treatment; Insects in buildings; Cooling; Humidity; UV traps; Biological control; Insecticides; Insects in objects; Physical Control; Freezing; Heating; Nitrogen; Oxygen scavengers; Carbon dioxide; Radiation; Insecticides; Fumigation; Damage to objects by chemical treatments; Residues and risk from past treatments Chapter 6: Rodents and Birds - Rodents as pests; Rodent lives; Detection; Preventing infestation; Rodent control; Birds Feral pigeons, sparrows and starlings; Management of birds; Repellents and deterrents; Other vertebrate pests; Bats Chapter 7: Implementing Integrated Pest Management - Pest Control Strategy; Museum Practice; Risk zones; Resources; Collection Policy, Museum Objectives & Functions; Interaction with Other Museums; Insect problems in tropical climates; Age of Collection and Buildings and Special Constraints; Training and Communication; Pest control contractors; The future References and further reading; Glossary; Index.

Medieval social/political theory from Christine de Pizan, France's first female professional writer.

Seminar paper from the year 2011 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,0, University of Applied Sciences Essen, language: English, abstract: This paper contains 2 Marketing Assignments evaluated with an excellent grade and written in 2011 for a MBA course at the FOM in Germany. It demonstrates how to easily apply a Marketing Analysis exemplified by a consumer product. Moreover, it contains a Market Analysis, Marketing Objectives and Strategy based on SWOT/PEST/Porter, Unique Selling Propositions and the model of Four P's. The author introduces the new Marketing and Loyalty Mix as an adjustment to the original Marketing Mix. ----- Dieses Buch beinhaltet 2 mit der Note 1,0 bewertete Seminararbeiten aus dem Jahr 2011 in dem Fach Marketing für ein MBA-Studium an der FOM in Deutschland. Es veranschaulicht, wie auf einfache Weise eine Marketinganalyse für Konsumgüter erstellt werden kann. Dies wird durch eine Marktanalyse, Marketing Ziele und Strategien basierend auf SWOT/PEST/Porter, USPs und den Four P's umgesetzt. Der Autor erweitert den Marketing Mix und stellt den neuen Marketing und Loyalty Mix vor.

A working guide to help people recognise insect, rodent and bird pests and take practical steps to prevent and control damage to collections.

The Total School Cluster Grouping Model is a specific, research-based, total-school application of cluster grouping combined with differentiation, focused on meeting the needs of students identified as gifted while also improving teaching, learning, and achievement of all students. This revised and updated second edition of Total School Cluster Grouping and Differentiation includes rationale and research followed by specific steps for developing site-specific applications that will make the important art of differentiation possible by reducing the range of achievement levels in teachers' classrooms. Materials to support staff development-including powerful simulations, evaluation, management, special populations, differentiation strategies, social and emotional needs, and recommended materials-are included.

'This open access book addresses an urgent issue on which little organized information exists. It reflects experience in Africa but is highly relevant to other fragile states as well.' -Constantine Michalopoulos, John Hopkins University, USA and former Director of Economic Policy and Co-ordination at the World Bank Fragile countries face a triple data challenge. Up-to-date information is needed to deal with rapidly changing circumstances and to design adequate responses. Yet, fragile countries are among the most data deprived, while collecting new information in such circumstances is very challenging. This open access book presents innovations in data collection developed with decision makers in fragile countries in mind. Looking at innovations in Africa from mobile phone surveys monitoring the Ebola crisis, to tracking displaced people in Mali, this collection highlights the challenges in data collection researchers face and how they can be overcome.

A Primer on Reptiles and Amphibians is an innovative educational resource designed to forge a connection between the reader and the creeping critters of the world. Turtles, frogs, lizards, salamanders, snakes, and crocodiles; these animals evoke fear and fascination. This primer dispels myths and unlocks mysteries surrounding these diverse survivors which have mastered virtually every habitat on Earth. Tragically, these animals now face pressures of unprecedented severity, but there is still time to make a difference if more of us work together.Micha Petty is an international award-winning Master Naturalist and wildlife rehabilitator. This critically-acclaimed debut volume is a collection of Micha's interpretive writings, carefully crafted to make learning easy for everyone. These bulletins display his passion for Conservation Through Education while covering topics such as living harmoniously with wildlife, physiology, natural history, observation, and conservation. Flip to any page to be instantly introduced to new facets of reptiles, amphibians, the perils they face, and how you can join the fight to save them.
