Publisher Description

Students in a regular

Online Library Stanford

Binet 5 Manual

physical education program typically learn skills through observation and practice. Teachers and specialists working with students who are sensory impaired with multiple disabilities face unique

Online Library Stanford Binet 5 Manual

challenges. Because such students make up a small percentage of the population, physical education texts on adaptation, instructional strategies and activities for groups give only minimal

Online Library Stanford Binet 5 Manual

information about working with them. This new book explores the issues of the physical education curricula for sensory handicapped children. Typically, these curricula are based on old techniques that have been

Online Library Stanford Binet 5 Manual

used since time immemorial.
Rather than examine how
teachers utilise obsolete
curricula, this important
book examines how they
effect the students.
