The Ecological Hoofprint examines the industrialization of livestock production on a world scale, which is the driving force behind the phenomenal and uneven increase in global meat consumption, and the momentous but greatly underappreciated implications of this trajectory. The central argument of the book is that industrial livestock production and the 'meatification' of diets constitute a large and growing vector of environmental degradation and worsening human inequality, as well as ...

'In The Ecological Hoofprint Weiss puts meat at the centre of global problems like climate change, poverty, workers' rights and speciesism. Anyone seeking a just and sustainable world needs to consider his compelling argument that radical change must start by combating the meatification of the human diet.'
