The co-host of *Project Runway*, known for being friendly and approachable, explains how readers can find their true selves and lay the groundwork for success and happiness. By the author of *Tim Gunn's Guide to Style*.

An in-depth analysis of the folklore surrounding gun use and the state of the debate in today's political climate.

The Guardian's Pick for Best Science Fiction Book of the Year! A timely and uncanny portrait of a world in the wake of fake news, diminished privacy, and a total shutdown of the Internet BEFORE: In Bristol 's center lies the Croft, a digital no-man ' s-land cut off from the surveillance, Big Data dependence, and corporate-sponsored, globally hegemonic aspirations that have overrun the rest of the world. Ten years in, it ' s become a center of creative counterculture. But it ' s fraying at the edges, radicalizing from inside. How will it fare when its chief architect, Rushdi Mannan, takes off to meet his boyfriend in New York City—now the apotheosis of the new techno-utopian global metropolis? AFTER: An act of anonymous cyberterrorism has permanently switched off the Internet. Global trade, travel, and communication have collapsed. The luxuries that characterized modern life are scarce. In the Croft, Mary—who has visions of people presumed dead—is sought out by grieving families seeking connections to lost ones. But does Mary have a gift or is she just hustling to stay alive? Like Grids, who runs the Croft ' s black market like personal turf. Or like Tyrone, who hoards music (culled from cassettes, the only medium to survive the crash) and tattered sneakers like treasure. The world of *Infinite Detail* is a small step shy of our own: utterly dependent on technology, constantly brokering autonomy and privacy for comfort and convenience. With *Infinite Detail*, Tim Maughan makes the hitherto-unimaginable come true: the End of the Internet, the End of the World as We Know It.

A New York Times political cartoonist and writer presents a collection of his most popular essays and drawings about life and government hypocrisy, exploring the darkly comic aspects of such topics as falling in love with unlikeable people, managing a friend with outspoken political views and reacting to a long acquaintance's sex-change operation. By the creator of *The Pain--When Will It End?*

A terror-filled story of one family and their friends, as they struggle to survive in a world overrun by ravenous creatures that hunt purely by sound... Soon to be a major motion picture.

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, *New York Review of Books*) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.
