This book explores the emergence, and in Poland, Hungary, and Russia the coming to power, of politicians and political parties rejecting the consensus around market reforms, democratization, and rule of law that has characterized moves toward an "open society" from the 1990s. It discusses how over the last decade these political actors, together with various think tanks, intellectual circles, and religious actors, have increasingly presented themselves as "conservatives," and outlines how these actors are developing a new local brand of conservatism as a full-fledged ideology that counters the perceived liberal overemphasis on individual rights and freedom, and differs from the ideology of the established, present-day conservative parties of Western Europe. Overall, the book argues that the "renaissance of conservatism" in these countries represents variations on a new, illiberal conservatism that aims to re-establish a strong state sovereignty defining and pursuing a national path of development.

Many people will know something about the life of Lutoslawski, but few know anything about Lutoslawski the man. In this record of a unique series of conversations which took place in March 1973, Balint Andras Varga fills out the picture of the Polish composer - his life and career, his compositional methods, and his views on the contemporary music scene, all combine to present a fascinating portrait of Lutoslawski, who holds a unique and individual place in music today.

Austrian poet Christine Lavant (1915-1973) was the recipient of many awards, including the Austrian State Prize for literature in 1970, yet most of her writings are still

waiting to be published in English. She finished this memoir in 1946, but it was not published until 2001 after it was discovered in the literary estate of translator Nora Wydenbruck. The 80-page memoir describes the month she spent in a county asylum in 1935, including her observations of the conditions of the asylum, details of her interactions with fellow inmates, and her feelings about the psychiatrists and nurses who were charged with her care. A biographical sketch and afterword were contributed by Ursula Schneider and Annette Steinsiek. Annotation : 2004 Book News, Inc., Portland, OR (booknews.com).

No one in their right mind travels across Siberia in the middle of winter in a modified Russian jeep, with only a CD player (which breaks on the first day) for company. But Jacek Hugo-Bader is no ordinary traveler. As a fiftieth birthday present to himself, Jacek Hugo-Bader sets out to drive from Moscow to Vladivostok, traversing a continent that is two and a half times bigger than America, awash with bandits, and not always fully equipped with roads. But if his mission sounds deranged it is in keeping with the land he is visiting. For Siberia is slowly dying — or, more accurately, killing itself. This is a traumatized post-Communist landscape peopled by the homeless and the hopeless: alcoholism is endemic, as are suicides, murders, and deaths from AIDS. As he gets to know these communities and speaks to the people, Hugo-Bader discovers a great deal of tragedy, but also dark humor to be shared amongst the reindeer shepherds, the former hippies, the modern-day rappers, the homeless and the sick, the shamans, and the followers of ‘ one of the six Russian Christs, ’ just one of the many arcane religions that flourish in this isolated, impossible region.

A man discovers the planet 's destiny in the ocean 's depths in this near-future novel by one of the twentieth century 's greatest science fiction authors. In the very near future, humanity has fully harnessed the sea 's immense potential, employing advanced sonar technology to control and harvest untold resources for human consumption. It is a world where gigantic whale herds are tended by submariners and vast plankton farms stave off the threat of hunger. Former space engineer Walter Franklin has been assigned to a submarine patrol. Initially indifferent to his new station, if not bored by his daily routines, Walter soon becomes fascinated by the sea 's mysteries. The more his explorations deepen, the more he comes to understand man 's true place in nature—and the unique role he will soon play in humanity 's future. A lasting testament to Arthur C. Clarke 's prescient and powerful imagination, *The Deep Range* is a classic work of science fiction that remains deeply relevant to our times.

Presents loosely connected novellas that depict Polish life and situations such as suicide, teacher infatuation, chess, and sexual fantasy from the male perspective.
